

# Recommendations about the creation of local networks for the dissemination of the project results

---

In order to improve on the dissemination of the project results, throughout the course of the project, project partners will search for local organisations working in a field related to the project and that would be potentially interested in the work of the partnership and its final results of the project or to work as a partner on future projects. According to this, each project partner will act as national coordinator of the partnership in each country and will send information about the project to those organisations.

The organisations can be:

- Schools and Universities;
- Day centres;
- Local municipalities;
- Public administrations;
- NGOs;
- Hosting families;
- Private companies or foundations. etc
